- **Email & Messaging Services:** Mailjet (OTP authentication, transactional emails)
- **Developer Tools:** Git, GitHub, Postman, Jira, BrowserStack
- **Leadership & Soft Skills:** Team Leadership, Mentoring & Training, Communication, Problem-Solving

WORK EXPERIENCE

Senior Software Developer & Team Lead

April 2025 – Present

Yoho Technologies Pvt. Ltd. | Chennai, Tamil Nadu, India

- Lead and manage the in-house development team; oversee complete project lifecycle from requirements and architecture to deployment and maintenance
- Independently designed, developed, and deployed 7 live production applications — covering payroll, HR, recruitment, and corporate portals
- Act as in-house trainer for newly onboarded freshers, delivering technical training and code reviews to accelerate their productivity
- Established team-wide coding standards, Git branching workflows, and project documentation practices
- Collaborate directly with management and stakeholders to define requirements and deliver solutions aligned with business objectives

KEY PROJECTS

SlipHub — Payroll Management System — React.js, SQL, Mailjet

An internal payroll platform where employees securely access official payslips generated from attendance data.

- Designed and built the complete front-end using React.js with a responsive, user-friendly interface
- Integrated Mailjet for OTP-based secure login authentication
- Architected the SQL database schema for attendance records and payslip generation
- Independently handled end-to-end — currently live in production

Job Career Portal — Internal Recruitment Platform — MERN Stack, AWS S3, Mailjet

A full-cycle recruitment portal managing job postings, candidate applications, interview scheduling, and offer letter delivery.

- Built full MERN stack application covering job listings, candidate application flows, and interview process management
- Integrated AWS S3 for secure document and file uploads; Mailjet for automated notifications and offer communication
- Independently handled end-to-end — actively maintained in production

Employee User Portal — HR & Operations Management System — *MERN Stack, AWS S3, Mailjet*

A comprehensive internal HR portal covering the full employee lifecycle — from onboarding to exit documentation.

- Developed 12+ operational modules: document verification, onboarding, asset management, leave & permission management, ticketing, announcements, holiday calendar, leave policies, company policies, task management, and appointment/experience letter generation
- Integrated AWS S3 for employee document storage and Mailjet for workflow notifications
- Independently handled end-to-end — live in production with ongoing feature enhancements

Company Blog Portal — *React.js, MySQL, AWS S3*

Official public-facing blog portal for the company website to manage and publish content.

- Developed a dynamic blog platform in React.js with MySQL for content storage and AWS S3 for media management
- Independently handled end-to-end — currently live in production

3 Corporate Static Websites — *React.js*

Responsive marketing websites developed for three separate client companies.

- Built performance-optimized, fully responsive React.js websites from UI design to deployment for three distinct companies
- All three independently handled and live in production

Learning Management System (LMS) — *MERN Stack*

An LMS platform developed collaboratively as part of the team.

- Contributed as an active team member to front-end and back-end development of the LMS platform
